

# GARDEN GUARDIANS OF THE BAY

PROTECT OUR BAY - GARDEN THIS WAY  
USE SLOW RELEASE FERTILISERS

## USE SLOW RELEASE FERTILISERS

Garden Guardians of the Bay will save the day - protecting Geopraphe Bay for all of us.

Slow release fertilisers release nutrients over a longer time, so you don't have to apply it as often, and it's less likely to run off into our waterways.

Before using fertiliser, assess if your plants need it and are actively growing. Follow the product's instructions, only apply in spring and autumn (not before rain). It can be added to the soil when planting new plants.

### PROTECT OUR BAY

The fertilisers that we put on our gardens run off into waterways and groundwater. The health of Geopraphe Bay and local wildlife is at risk if this nutrient runoff increases.

### GARDEN THIS WAY

Garden Guardians keep nutrients where they belong:

- Grow native plants. Add clay to sandy soils. Apply soil wetter.
- Use mulch. Use composted manures.
- Use slow release fertilisers.

Become a

# GARDEN GUARDIAN OF THE BAY

and have a beautiful garden that also takes care of the environment.
